When President Taft in his famed Winona speech in September said that the Payne tariff law was the best tariff law ever enacted by a republican congress and that this would be demonstrated in the working of the act, even some of his admirers thought him extravagant in his use of language. Apparently the president had expert statistical advice before he made his Winona utterance for the figures are now at hand which seem to support all Mr. Taft's enthusiastic comment on the Payne law. WHERE THE MEAT PROFIT GOES

Thirty-eight per cent, above wholesale price for meat is what the consumer pays if Secretary Wilson's investigations are correct, and he says they are.

Fifty cities, large, medium and small, in all parts of the country were selected for a study of the meat question; and careful comparisons of the wholesale price and the price charged consumers by retail dealers were made. In eleven cities the difference between wholesale and retail prices was over 50 per cent; and they ran down to less than 20 per cent in five cities, the average being 38 per cent.

Without further parley he turned on his beel and marched out to the cloakroom, hatted and cloaked himself, and went from there to the stables. Although it did not consume half an hour—the putting between shafts and buckling up of the horse-Tempest fumed at the groom and with nervous haste himself threw in rubber blanket and rugs. It was pouring in sheets when he came pelting out of the stable; the man threw loose the mare's head and the fresh beast started rapidly out into the roadway.

Tempest had asked for a horse not ably neither his fastest nor best, but a sure spimal who had eyes for the dark like a cat's and who could have felt her way to Cravenford.

The master of Craven hardly hoped to discover so soon as the park road the guest so rudely allowed to leave his doors. Even a poor walker would have made the drive and the turn into the mair road that led to Cravenford. Nevertheless, he peered, and as it was far from dark it seemed needless to

lean forward as Tempest did to search the roadside for so conspicuous an obno mear height or figure.

His horse pounded through the mud, bit well in her teeth, her head down; the shor, incessant rain was a spur. Tempes thought of the high heels of the ladys shoes, and grew hot with shame. "Feminine folly!" he muttered. What modern twentieth-century emincipation! A young woman,
